INNOTRACKS...

...a name which stands for innovative technologies and outstanding quality in the planning, construction and operation of Adventureparks, High Rope Courses and modern climbing facilities.

Let youth fantasies become reality...

Like Tarzan swinging through the air, ten meters above the ground - overcome your anxieties and experience an unforgettable time outdoors - always with back-up nets and double security measures.

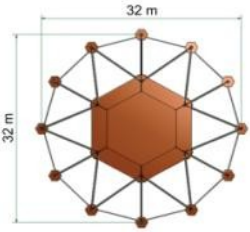

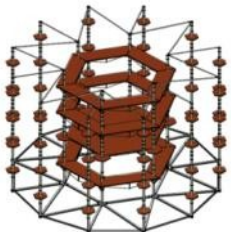

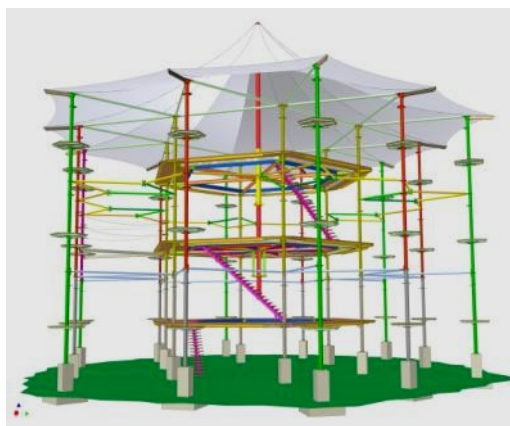

Many active people these days search for extraordinary, challenging but still nonhazardous recreational activities. Due to a special security system, it is possible to traverse the high-rope-courses independently with family, friends, school classes or colleagues.

Different courses with various degrees of difficulty allow each person to undergo his own adventure.

INNOTRACKS – THE ADVENTURETOWER

AdventureTowers are the space-saving miracles with an revolutionary design, based on modular system with steel masts. Up to 120 climbing-stations on a floor area of only 1000 square meter – it is ideal for cities and tourist magnets. A special team-parcours, a membrane-roof and a illumination system is also available. One tower – many possibilities.

INNOTRACKS – THE ADVENTUREPARKS (TREES)

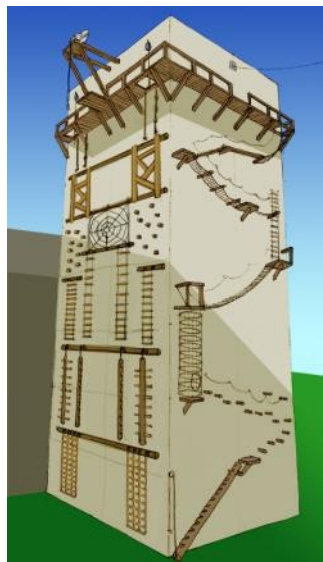

Experience this intense jungle-feeling in a course from tree to tree. With tree-friendly construction methods and a harmonic design – the green dimension of ropes courses.

There are adaptable degrees of difficulty and the courses can accommodate a high number of participants of different heights, ages and proficiencies. Participants can complete the course unassisted thanks to a continuous belay loop.

INNOTRACKS – THE ADVENTUREPARKS (POLES)

An AdventurePark from pole to pole or a combination of poles and trees, offers a maximum of variety and capabilities. Enjoyable, exciting and never before seen attractions – made for a high density of public access on the highest safety standard. In the periphery of cities, next to tourist attractions and local recreational areas – the perfect destination for a day trip.

INNOTRACKS – ADDITIONAL ATTRACTIONS

ZIP-LINES: Fly through the air along a cable for 50, 100 or even 500 metres. High speed and most attractive.

GIANT SWING: Get ready for this simple attraction with a maximum effect. The butterflies in your stomach come free!

FAN DECENDER: Step off a tower and fall until you come to a stop just above the ground. Excitement is guaranteed!

TEAMPARCOURS: A lot of creative and fantastic team-elements. Teambuilding at the highest level.

TREE HOUSES: Large terraces, sleeping quarters and even small weekend homes. Ask us for the possibilities.

PLAYGROUNDS: A playground situated in or around a ropes course is ideal for keeping the kids amused.
